For two full days he sat in the sun and pounded rock, while his faithful dog sat by his side and bore him company.

A MR. BALLARD of San Francisco possesses a \$5 gold coin, coined by the Mormons in 1849. In that year Brigham Young established a mint and coined about \$1,000,000 in \$5 gold pieces. These coins soon found their way to California and passed current. The metal in the coins was unalloyed—so soft and pure, in fact, that it wore away very rapidly.

MANY of the principal houses in Pompeii and Herculaneum had Roman glass windows. The Egyptians made glass at least 3,000 years B. C. In some of the tombs near ancient Thebes there are still to be seen pictures of workmen blowing glass in much the same way in which it is blown to-day. After Rome was destroyed by the barbarians the art of fine glass making was nearly lost, and only churches and public buildings had glass windows.

THE will of W. S. Culbertson of New Albany, Ind., has been probated. His estate, which is estimated to be worth from \$3,000,000 to \$7,000,000, is divided between his wife and children. Gus Woods, a former citizen of Bracken county, now living near Falmouth, was in that place Monday with a wagon loaded with groceries. His horses became frightened at a large sign and started to run when he caught one of them by the bridle, which came off and he fell under the wagon, the wheels passing over his head and body. His injuries are very serious. His wife, who was in the wagon at the time, did not leave it until the horses were stopped.

THE Kentucky House adopted the judicial redistricting bill, as passed by the Senate, by a vote of 41 to 37. A veto from the Governor is predicted, as it is manifestly contrary to the directions of the Constitution, which prescribes that the districts shall be constituted with due regard to population and the amount of work heretofore transacted. One of the districts named in the bill has a population of only 44,000 and 254 cases on the docket, while another has a population of 76,000 and 916 cases on its docket. There are several such glaring inequalities, and five or six more districts are made than are necessary.

JOHN CARR of color and Owingsville must be a b-a-d man, judging from what *The Opinion* says. He was up in the police court Saturday, charged with several crimes of a more or less aggravated nature. On the charge of assault and battery he was fined \$25 and ten days in jail, and on the charge of discharging firearms he was fined \$5 and cost. On still another charge he was held in the sum of \$500 to await the action of the Circuit Court. He was under \$500 for cutting and wounding Jim Jack. This makes the total of \$1,000 that John will be required to put up before he can again breathe the air of freedom.

THE habitues of the "Over the Rhine" beer halls in Cincinnati were treated to a very unusual sight Monday night, says *The Commonwealth*. It was nothing less than a visit from a party of distinguished delegates to the Prohibition National Convention. About 11 o'clock ex-Governor St. John, Mrs. St. John, Rev. M. C. Lockwood, Mrs. Helen Gougar, Charles C. Moore (of *Bluegrass Blade* fame) and others entered the principal beer gardens, remaining some minutes in each, noting the character of the performance and studying the faces and demeanor of the men and women who were assembled there. They expressed surprise at finding such quiet and order observed at the several resorts visited.

THIRD PARTY.

Here is the Platform That Will be Adopted at Omaha.

The Leaders of the Divers Elements of the People's Party

Have It All Fixed, and It is Said to Be Satisfactory All Around—The St. Louis Platform of February 23 Taken as a Basis—The Force Bill.

OMAHA, July 1.—The people's party will meet in national convention at 10 o'clock Saturday morning. The delegates are already beginning to arrive, and there are indications that the natal day of the republic, the Fourth of July, will witness the birth of a great political party which is to be a menace to the old organizations which have so long striven for supremacy in the nation.

The rival political organizations who have hoped that the people's party would divide over questions of principle, and not be able to agree upon a common platform of declarations, will be surprised to know that the people's party platform is already practically agreed upon. The leaders have been in correspondence for months past, and it is tacitly agreed that the St. Louis platform of February 23 shall be taken as a basis, and that the only extraneous matter to receive consideration will be the denunciation of the force bill; the demand for a broader reciprocity than is offered by the party of republicanism, and the condemnation of the recent state bank plank adopted at the national democratic convention.

The platform which Chairman Tausenbeck, of the national executive committee, has in his pocket, and which Mr. Weaver, Ignatius Donnelly, Congressman Watson, Jerry Simpson and the other leading spirits of the party agree shall be adopted as the war cry of the coming campaign, is as follows: "First—We demand a national currency, safe, sound and flexible, issued by the general government only, a full legal tender for all debts, public and private, and that without the use of banking corporations, just equitable and efficient means of distribution direct to the people, at a tax not exceeding two per cent, be provided, as set forth in the sub-treasury plan of the Farmers' alliance or some better system; also, by payments in discharge of its obligations for public improvements.

"We demand free and unlimited coinage of silver.

"We demand that the amount of circulating medium be speedily increased to not less than \$50 per capita.

"We demand a graduated income tax.

"We believe that the money of the country should be kept as much as possible in the hands of the people, and hence we demand that all state and national revenues shall be limited to the necessary expenses of the government economically and honestly administered.

"We demand that postal savings banks be established by the government for the safe deposit of the earnings of the people, and to facilitate exchange.

"Second—The land, including all the natural resources of wealth, is the heritage of all the people, and should not be monopolized for speculative purposes, and alien ownership of land should be prohibited. All land now held by railroads and other corporations in excess of their actual needs, and all lands now owned by aliens should be claimed by the government and held for actual settlers only.

"Third—Transportation, being a means of exchange and a public necessity, the government should own and operate the railroads in the interest of the people.

"(A)—The telegraph and telephone, like the post office system, being a necessity for transmission of news, should be owned and operated by the government in the interest of the people."

In addition to the above there will be a plank which is expected to frustrate the herculean efforts that are being exerted by the democratic leaders of the south to reclaim their fellows from the people's party ranks. This plank will be a denunciation of the republican force bill, and will be as ringing and complete as the arraignment by democratic national convention.

The leaders of the independent party have given this subject most careful consideration, have weighed its effect in all its details, and they announce to-night that the die is cast; that the force bill of the republican party will be denounced as an unwarranted, dangerous and unconstitutional interference in state elections.
